

Description

This meter is laying and water pressure anchor type and measure settlement at the measuring point.

Feature

- High precision and stability
- Sure installation by water pressure anchor at the measuring point.
- Waterproof and dustproof
- Easy connection with automatic measuring equipment

Application

This meter is installed by water pressure anchor in the borehole, and installation surface is wide and strong, so this meter is fixed strongly at the installation point and cannot occur to move point of anchor.

Specification

Type	EMS-□
Range	0.5 ~ 5m
Conversion Method	Potentiometer
Settlement type	Water pressure anchor
Non-linearity	1% RO
Safe Temperature Range	-20 ~ 60 °C
Resistance	350 Ω
Safe Exciting Voltage	Less than 5V
Isolation resistance	More than 50 MΩ
